1. Introduction

Problem Statement

1. Medication non-adherence is a critical issue in global healthcare, leading to increased hospitalizations, treatment failures, and avoidable costs.
2. Up to 50% of patients do not take their medications as prescribed due to forgetfulness, complex regimens, and lack of support.
3. Elderly and chronically ill patients are particularly vulnerable, and caregivers often lack real-time insights into adherence.

Solution Proposed

1. An AI-enabled, cross-platform solution that provides intelligent medication reminders and tracks adherence.
2. Facilitates seamless appointment scheduling with healthcare providers.
3. Empowers patients, caregivers, and healthcare providers to collaborate for better health outcomes

2. Objectives

- To make a seamless interface for patients to add up details (name, age, etc.).
- To provide notifications for medicine intake times and alerts for upcoming doctor visits.
- To make a calendar view for upcoming appointments.
- To enable caregivers and providers to monitor patient adherence.
- To ensure data privacy and compliance.

3. Scope

Can be applied in the digital healthcare management domain to provide AI-enabled, cross-platform medication reminders and seamless appointment scheduling

Can be highly useful to elderly and chronically ill patients who are particularly vulnerable to missing doses due to complex medical regimens or forgetfulness

Can be applied by caregivers to gain real-time insights and monitor the medication adherence of the patients they are looking after

Can be useful to doctors and healthcare providers by generating tracked reports of doses taken or missed, allowing for better collaborative health outcomes.

4. Feature /Functionality

Feature 1: Medication Tracking & Alerts

Provides notifications for medicine intake times and tracks doses taken or missed.

Feature 2: Appointment Management

Allows users to book, edit, reschedule, or cancel medical appointments and receive alerts.

Feature 3: Reporting & Monitoring

Generates reports for patients and providers while enabling caregivers to monitor adherence.

5. Outcome of Project

- User can seamlessly add personal details and interact with the interface
- User can view a dedicated calendar for upcoming appointments
- User can book, edit, or cancel appointments as needed
- User can track medication doses and generate adherence reports for providers

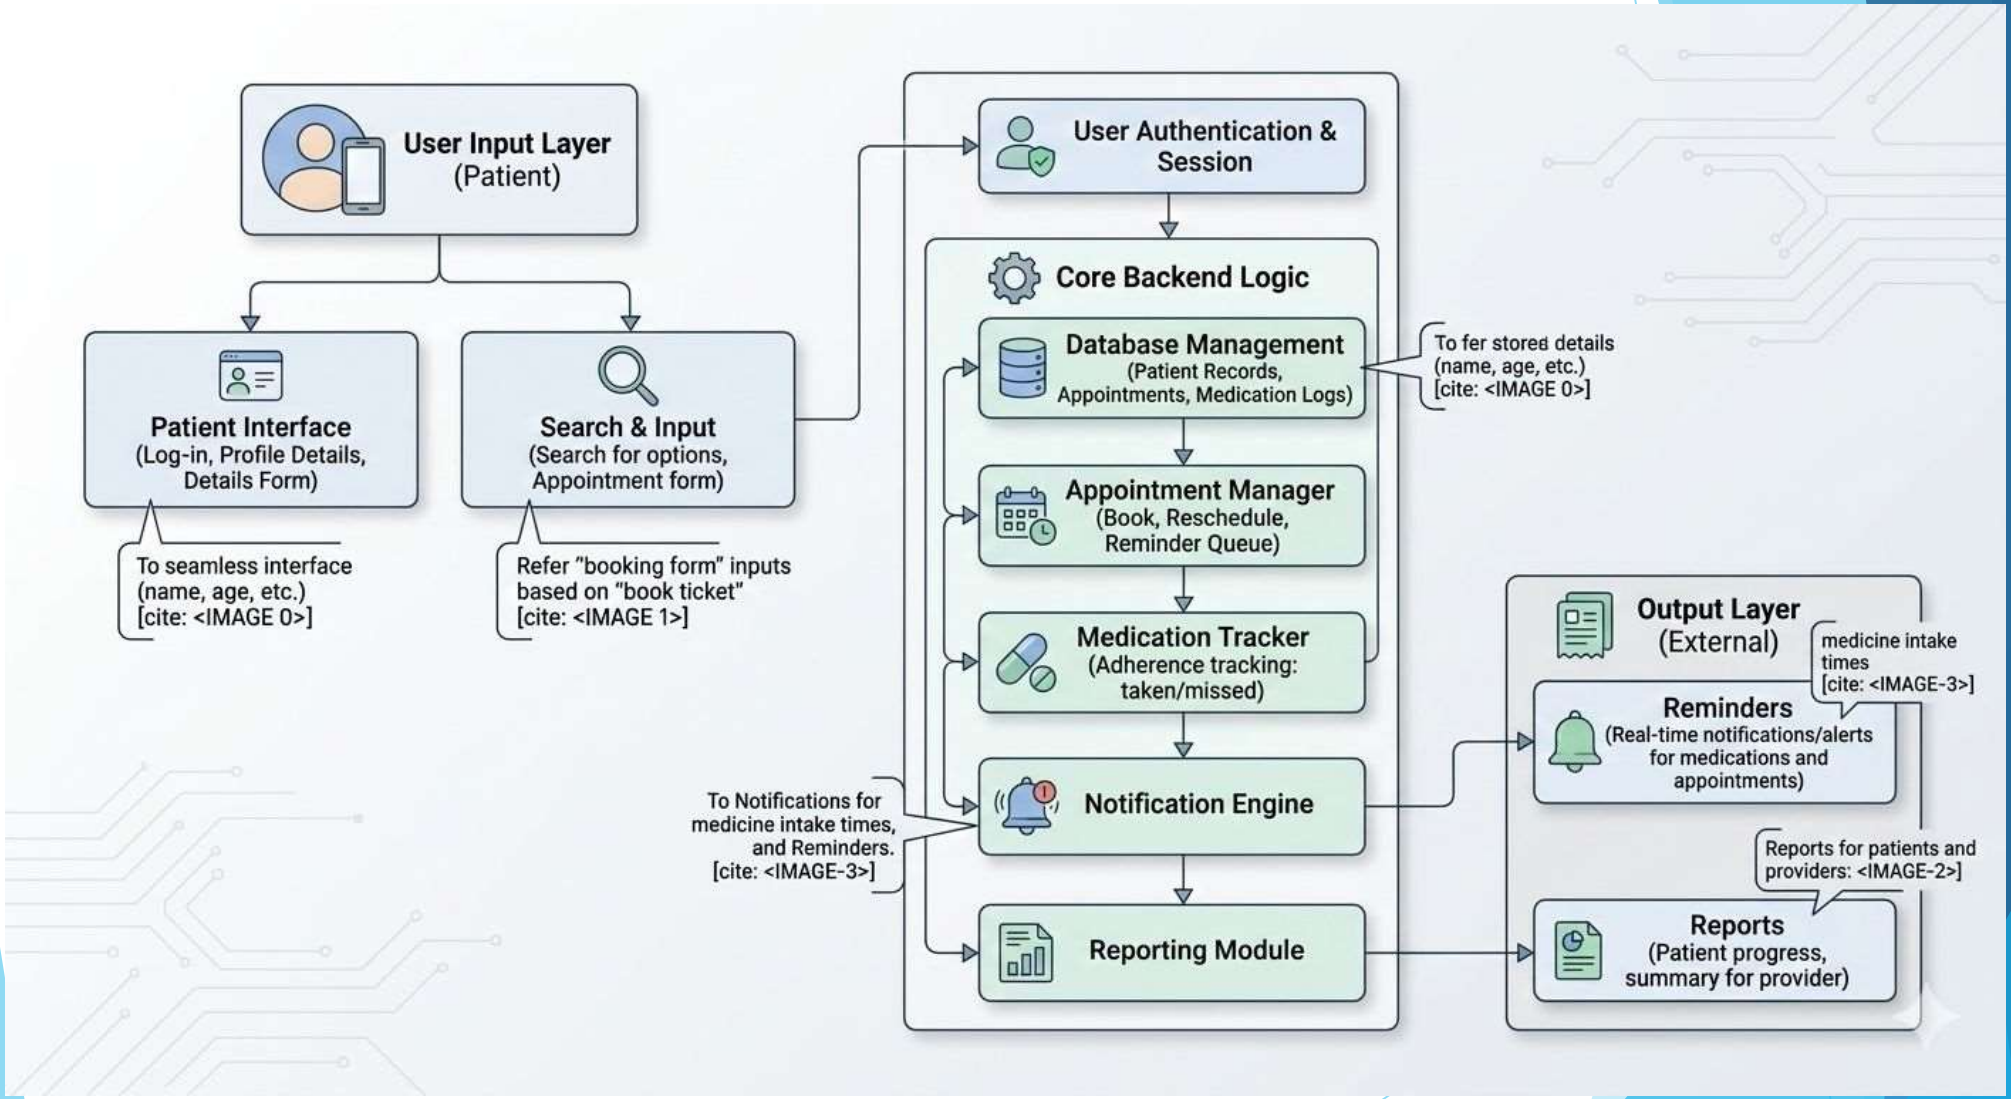
6. Technology Stack

Frontend: Flutter and Dart

Backend: Firebase

Database: Firebase

7. Block Diagram



8. SDG

Alignment with SDG 3: Good Health and Well-being

-Improving Medication Adherence

-Chronic Disease Management

-Access to Healthcare Providers

-Preventative Care

Secondary Alignment: SDG 9 (Industry, Innovation, and Infrastructure)

-Technological Advancement

-Digital Transformation
